Roles in this document

1. Tasos Venos, George Douroukas (project managers, writers)
2. Manolis Minadakis, Alexis Giannoutsos (check)

Tools

1. Figure 1 is UML Diagram from Moqups.com

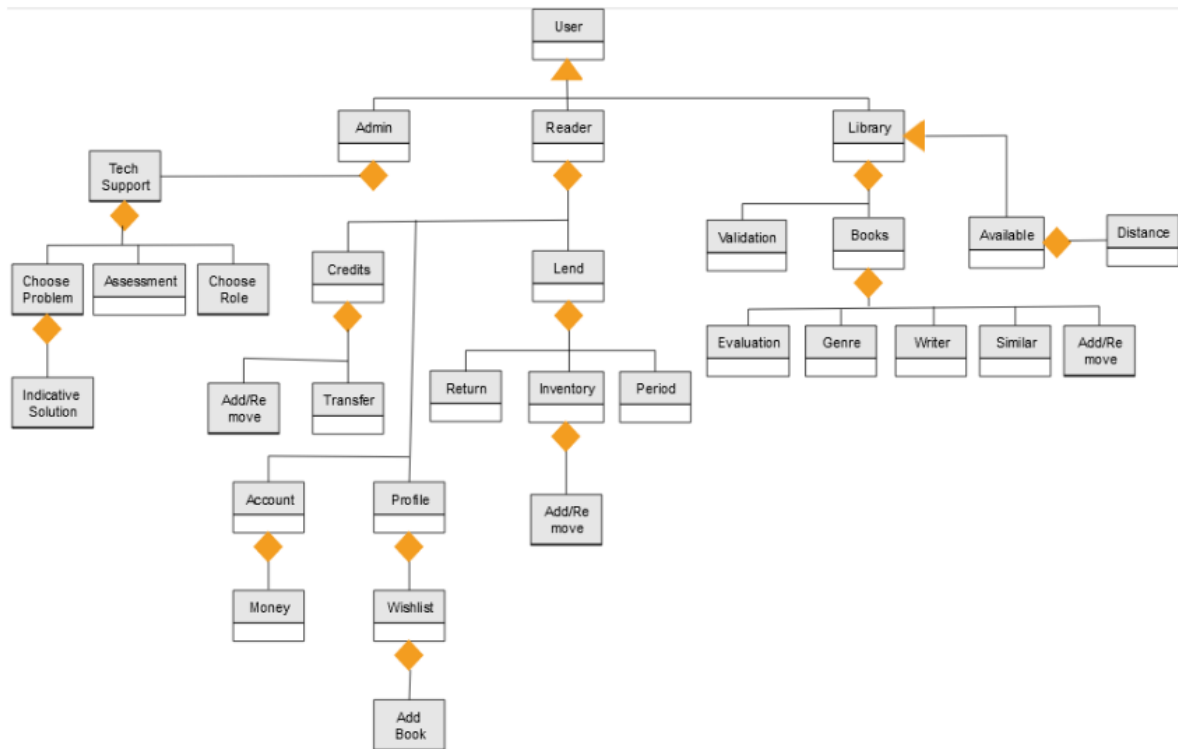

Figure 1: Schematic Diagram of the Domain Model

- 1) User: A general entity that can register in the system as a reader, as a library, or as an admin.
- 2) Reader: special case of a user. He/she can borrow books and make use of the system services.
- 3) Library: special user case. Can add/remove books from the database.
- 4) Admin: Special user case. He/she manages the system for its better functioning.
- 5) Books: Entity that can be borrowed by the reader for a specific period.
- 6) Credits: an entity that the reader earns after borrowing and evaluating books and can use it to buy books.
- 7) Lend: Action taken by the reader to acquire a book.
- 8) Writers: Persons who have written the books.
- 9) Genre: Types of books chosen by readers.
- 10) Evaluation: action readers perform on books they have borrowed, giving a score of 1-10.
- 11) Period: entity indicating the length of time a reader can borrow a book.
- 12) Tech Support: Entity that helps readers with problems they encounter.

- 13) Add Book: action of the library to increase the number of books available.
- 14) Remove Books: action of the library to reduce the number of books available.
- 15) Return: action the reader must take when the borrowing period is over.
- 16) Distance: Entity showing the nearest bookstores in the reader's area.
- 17) Profile: Entity containing information about the reader.
- 18) Available: Libraries that have the book the reader has searched for (Library subcategory)
- 19) Validation: library's decision to provide the book the reader is looking for.
- 20) Inventory: entity that keeps track of which books a reader has borrowed.
- 21) Add Book(inventory): Action that adds a book to the reader's inventory.
- 22) Remove Book(inventory): Action that removes a book from the reader's inventory.
- 23) Choose Problem: User action to indicate the problem he/she is facing.
- 24) Indicative Solution.
- 25) Assessment: action of the user giving a rating of how good the service was provided by the IT department.
- 26) Wishlist: Entity that contains the books that the reader wishes to borrow in the future.
- 27) Transfer: action in which a user gives credit to another user.
